

Business Recommendations

Retail Sales Analytics Dashboard

This document summarizes strategic recommendations derived from the Retail Sales Analytics Dashboard. The recommendations are intended to help stakeholders improve revenue growth, profitability, customer retention, and operational efficiency.

Revenue Growth

- Increase investment in high-performing products and regions.
- Monitor quarterly sales trends to identify seasonal demand.
- Replicate successful sales strategies in underperforming regions.

Product Portfolio Optimization

- Prioritize high-margin products.
- Review products with high sales but low profitability.
- Consider repositioning or discontinuing consistently underperforming products.

Pricing & Discount Strategy

- Review products receiving high discounts with low profit.
- Introduce approval thresholds for aggressive discounting.
- Track promotional effectiveness using KPI dashboards.

Customer Strategy

- Develop loyalty programs for top customers.
- Run targeted campaigns for repeat customers.
- Re-engage inactive customers using personalized offers.

Regional Strategy

- Increase investment in top-performing regions.
- Investigate low-profit regions for operational issues.
- Use regional insights to guide expansion decisions.

Operations & Logistics

- Monitor average shipping days regularly.
- Investigate delays by shipping mode and geography.
- Improve delivery efficiency to enhance customer satisfaction.

Executive Reporting

- Review KPIs during monthly business meetings.
- Track Sales, Profit, Margin, Customers, and Shipping KPIs.
- Set measurable targets for continuous improvement.

Future Enhancements

- Implement forecasting.
- Add Row-Level Security (RLS).
- Publish to Power BI Service with scheduled refresh.
- Integrate CRM/ERP data.

Expected Business Impact

Recommendation Area	Expected Outcome
Revenue Growth	Higher sales and market growth
Product Optimization	Improved margins
Pricing	Reduced margin erosion
Customer Strategy	Higher retention and customer lifetime value
Regional Strategy	Better resource allocation
Operations	Improved delivery performance

Conclusion

This dashboard provides executives with a centralized view of retail performance. Following these recommendations can help improve profitability, operational efficiency, and strategic decision-making.
